7. Resources
Director Kevin Guthrie
A funding opportunity is available to provide hurricane repair and recovery projects within counties designated in the Federal Emergency Management Agency disaster declarations for Hurricanes Ian or Nicole.

The Executive Office of the Governor, Division of Emergency Management is authorized to request budget amendments up to $350,000,000 to provide resources to fund gaps in:

- Restoration of disaster-damaged, publicly owned facilities: (FEMA categories C – G);
- Non-engineered beaches, and non-maintained dirt roads;
- Infrastructure repair and replacement, including road, sewer, and water facilities; beach renourishment; debris removal; and
- Mitigation of local and county revenue losses and operating deficits;
The Division is authorized to approve requests for resources for:

- Local governments,
- Independent special districts,
- School boards, including charter schools.
### Legislative Appropriation Program Overview

**Application Types:**

<table>
<thead>
<tr>
<th>Public Assistance</th>
<th>Infrastructure</th>
<th>Loss Revenue</th>
<th>City and County Match</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local governments with a need to complete permanent work (FEMA Categories C-G). Legislative Member projects will also be considered in this category.</td>
<td>Local government issues that are not eligible for FEMA reimbursement due to an eligibility issue, a Determination Memo or some other disqualifying factor. Examples in this category include non-engineered beaches, dirt roads that are not maintained, or projects that have a determination memo.</td>
<td>Mitigation of local and county revenue losses and operating deficits for jurisdictions when the Department of Economic Opportunity funding has been exhausted, or upon an applicant’s denial of that program funding from the Department.</td>
<td>The remainder of the funds, if available, will go to meet the provisions of local governments provided that the grant program requires matching funds by grantees of at least 50 percent of project costs. Examples in this category include infrastructure repair or replacement such as roads, sewer, water facilities, beach renourishment, seawalls/armoring, or debris removal.</td>
</tr>
</tbody>
</table>
Eligibility:

Funding is available for hurricane repair and recovery projects within counties designated in the Federal Emergency Management Agency disaster declarations for Hurricanes Ian and Nicole.

Basic Requirements:

Some examples of the required information may include FEMA project worksheets, insurance claims, denials, determination memos, revenue documentation, etc.

How the Program will be managed?

The Hurricane Recovery Program for Ian and Nicole will be managed through the Division of Emergency Management Enterprise Solution (DEMES). The portal will open on June 15, 2023.
DEMES (formerly known as Salesforce) is the solution that modernizes and digitizes FDEM’s forms and processes so we can move faster, leverage grant funding more efficiently, and provide an easier navigation experience for our agencies, partners, and internal staff.

**BENEFITS OF DEMES**

- Growing FDEM’s digital first mindset
- Easier navigation via automation
- Time savings via standardization and streamlining of processes
- Efficiencies via automated workflows and approvals
- Improved accuracy based on integrated quality assurance measures
- Visibility to where items are in a workflow
- Access to centralized data to drive informed decisions
What is Changing?

Assisting Agencies and FDEM partners will need to transition their current processes with paper forms to using the new digital functionality within DEMES. This will include the 2023/2024 Hurricane Legislative Appropriation Program application process. Assisting Agencies will experience faster processing times, reduced work via pre-populated data fields, quality controls for data accuracy, and an improved user experience.

Agencies will need to have an account in DEMES to apply to 2023/2024 Hurricane Legislative Appropriation Program
