### Next Meeting

- June 13, 2023, at 1:00 PM EST

## **Agenda Item: Guest Speaker on Housing Resilience**

**Guest Speakers:** Mary Williams (FDEM) & CJ Reynolds (The Florida Housing Coalition)

Speaking on the State-led Disaster Housing Task Force, lessons learned from Hurricanes Ian and Nicole, priority topics for the task force, and core principles for resilient communities and affordable housing.

- Slides will be at the end of the minutes and available in the website meeting documentation [here](#)

### **Questions:**

Can you address the number of counties that have the same allocation in the NOFA for Ian? How does that happen based on the allocation formula in rule?

- All 67 counties were declared for PA (Category A and B), so all counties received an HMGP allocation. The counties that did not incur additional PA, IA, or SBA, will all show the same allocation, because state projects were taken into account for those counties.

What is incentive funding for CAP-SSSE?

- CAP-SSSE funding is limited to state floodplain offices. Incentive funding can be used for additional projects/staffing, printing materials, etc. Anything to promote and enhance the program.

# Losing Affordable Housing to Disasters and Disconnects

- **Not replacing affordable and workforce units post-disaster.** New development skews toward higher.
- **Multi-family Properties Not Insured/Sufficiently Insured.** Post-Sandy HUD Inspector identified that 3 housing authorities in Maryland, NY and NJ *did not have flood insurance for 72 buildings that needed it.*
- **Long Rebuild Times.** With destroyed buildings, people likely to leave their community, because rebuilding post-disaster takes YEARS.
- **Lack of Integration for Recovery, Budgets and Goals.** Affordable housing is NOT YET well integrated with Resilient Infrastructure, Development and Disaster Recovery.
- **Residential Insurance Costs, Gaps and Replacement Costs.** Smaller/older homes in low-income areas receive smaller payouts. Families with paid-off mortgages may not have insurance.

# 3 Core Principles for Resilient Community and Affordable Housing

1. Hazard Vulnerability Assessment/LMS defines current and future storm/flood risks/impacts to public affordable housing stock.
2. Plans are aligned/coordinated – Local Mitigation Strategy, Local Housing Assisted Plan
  - robust Housing Disaster Strategy addresses all phases
  - supporting documents are prepared
3. Funding mechanisms (SHIP, HHRP, TIF, DR) AND budgets are strategically evaluated and aligned to address affordable housing mitigation, response, and long-term resilient repairs/rehab, in addition to rental assistance.

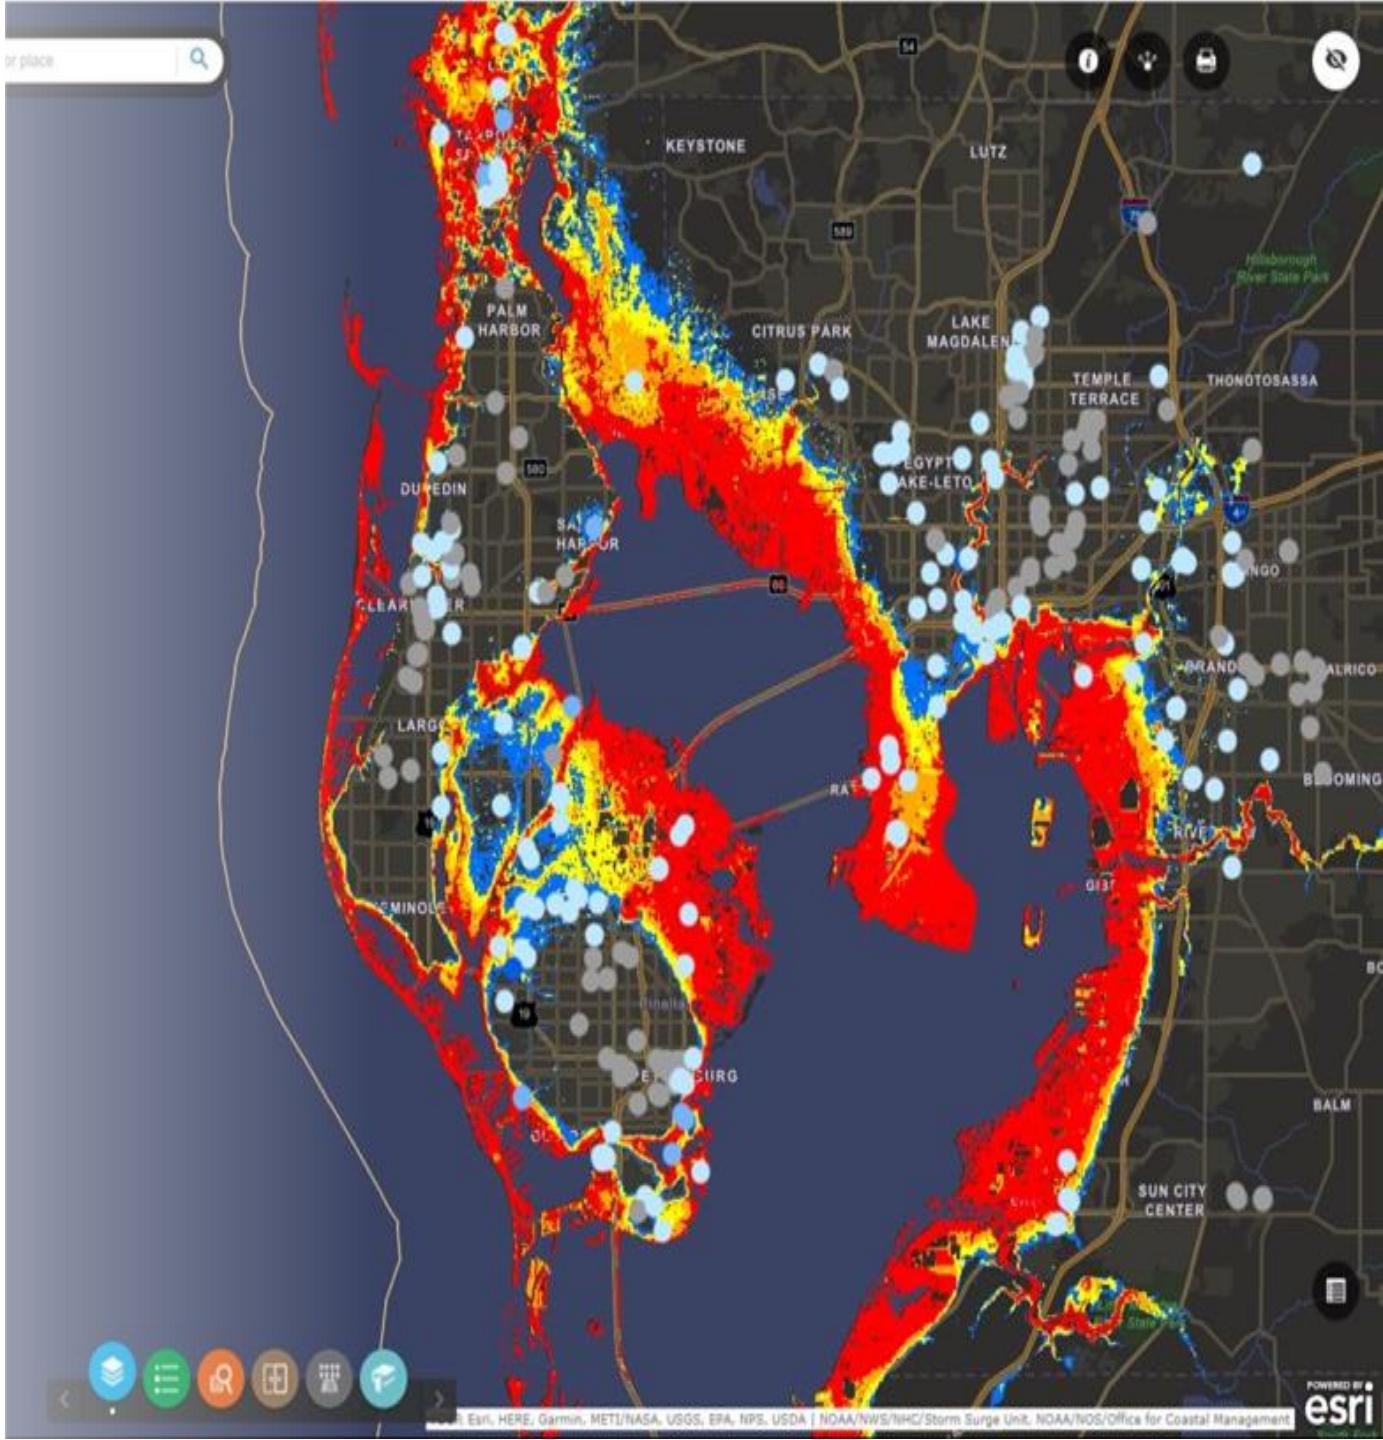

# Principle 1: Know Your Flood Risks

FS. § 380.093 established statewide programs for adapting to flooding and sea level rise. Local VAs, data and maps submitted to FDEP.

*Affordable public housing is defined as a critical community asset.*

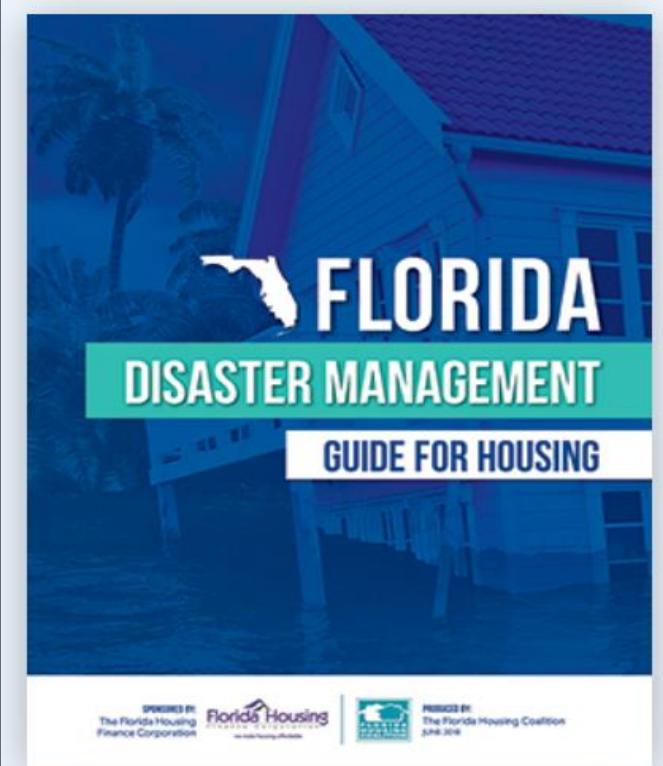

Assisted Multi-Family properties with multiple flood risks, overlay the LMI/special needs populations and small businesses.

# Principle 2: Plans Are Aligned

- Cross-walk your VA to the LMS Housing Section/Goals
- Support/Lead the update the Housing Disaster Strategy
- Updates housing disaster documents: application forms and templates for intake, verification of benefits, special rules and requirements for rehabilitation, reconstruction, elevation, and house relocation.
- Recruit hotels and other sites for FEMA TSA
- Multi-organization application for FEMA Information Access Agreement (County departments staff, non-profit service providers
- Prepare and adopt SHIP Disaster Strategy that includes emergency rental assistance and rehabilitation provisions

## Disaster Management Guide for Housing

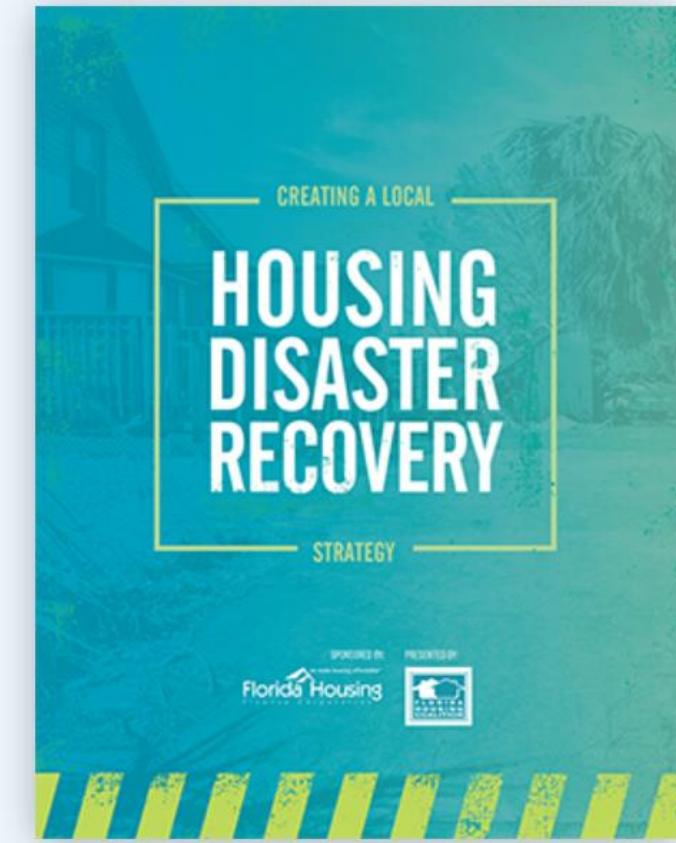

# Resources for EM, Housing and Resilience Staff

**Preparedness:** within county framework and housing delivery system

**Response:** volunteer roles and temporary housing needs for displaced

**Recovery:** short and long term permanent and equitable redevelopment

**Mitigation:** ongoing and post-disaster strengthening of housing and neighborhoods with a focus on resilience
